EDENTA DIAMOND FINISHING STRIPS

- ### Applications
- For contouring the proximal regions of all types of fillings
 - Removing excess material from the proximal regions of filling-materials like composites, acrylics, glass ionomer cements and amalgam
 - Removing excess cement after placing inlays, onlays and laminate veneers

- ### Advantages
- Contours the proximal regions anatomically
 - Simplifies working procedures through the serrated edge which separates interdental spaces quickly
 - The serrated diamonds strips have wider non-diamond coated area, which simplifies sawing
 - Serrated sawing edge and diamond-coated abrasive area combined in one instrument simplifies working procedures
 - Made of highly stable stainless steel to resist breaking and stretching for an economical service life
 - Autoclavable
 - Length: 5 3/4"

To be used without any water/cooling spray

Tissue Trimmer STT/FG-Shank: Designed for soft-tissue surgery, the STT ceramic tissue trimmer is a rotary instrument that can be used as an alternative to electrosurgery and surgical blades. The biocompatible hard oxide point is said to cut tissue without burning. Applications include modelling gingiva, opening the sulcus for impression, freeing deep cavities, lacerating inter-radicular granulation-tissue, removing gingival hyperplasia/papillectomies, and exposing intra-osseous implant sections and retined teeth.

MEDESY COMELLA'S FORCEP

The only forcep specially designed for the extraction of root fragments from the lower horizontal embedded eighth molars.

After parting the crown using a bur, the tooth is divided into two parts: mesial and distal.

The mesial part is accessible and easy to remove; the distal part can instead give some problems because:

- Positioning in the bone
- Retentive root shape
- Patient comfort (timing)

The root elevators and other tools currently used can be dangerous and cause damage to vessels and nerves, particularly the close lingual nerve.

Comella's forcep have a **secure, precise and steady** grip ensuring the integrity of the surrounding tissue.
